IN THE CLAIMS -

Please enter amended claim 1 as follows,

1. An advanced computer desk corner section comprising a pentagonal work surface having a top side and an underside with a front edge and two side edges, each on the opposite ends of the front edge disposed at a 45° angle to said front edge and two rear edges which meet at a 90° angle, the extension of the side edges being less than the extension of the rear edges;  
         a keyboard platform mounted beneath said front edge and which infinitely adjusts up and down and tilts to a negative or positive position and sized in one dimension at about 27 inches to receive both a (104) key keyboard and an adjacent mouse pad; and  
         the underside of said work surface having a control switch electrically connected to a surge protector unit having a plurality of electrical outlets therein, for said switch to electrically activate or deactivate the surge protector, said surge protector having a line cord and plug thereon.
